- Methodology
- Results
 - Visualization – Charts
 - Dashboard
- Discussion
 - Findings & Implications
- Conclusion
- Appendix

EXECUTIVE SUMMARY

- Analysis of the trends in Programming Languages and Databases.
- Demographic survey of the respondents.
- Potential help in policy making.

INTRODUCTION

- **About:** Analyzing the trends in ICT Development.
- **Purpose:**
 - Identify emerging developments for the future.
 - What are the top programming languages in demand?
 - What are the top database skills in demand?
 - What are the demographics of the skill acquirers?
- **Audience:** HR Heads, Policy Makers.

METHODOLOGY

- Data Collection through Stack Overflow Developer Survey.
- Data Exploration.
 - The initial step in data analysis involves reviewing a dataset to identify its characteristics and patterns
- Data Cleaning.
 - The process of fixing or removing incorrect, incomplete, or duplicate data.
- Data Visualization.
 - The graphical representation of information and data. By using visual elements like charts, graphs, and maps, data visualization tools.
- Presentation.

PROGRAMMING LANGUAGE TRENDS

Languages Worked With

Language Have Worked With

Languages want to work with.

Language Want To Work With

PROGRAMMING LANGUAGE TRENDS - FINDINGS & IMPLICATIONS

Findings

- HTML/CSS, SQL, JavaScript are top 3 languages used.
- Python and TypeScript set to become popular in future.
- Powershell will lose its charm in near future.

Implications

- Web Development Services are still in demand.
- Big Data querying is still done using SQL.
- Python will rise in demand due to emergence of AI/ML.

DATABASE TRENDS

Databases have worked with

Database Have Worked With

Databases want to work with.

Database Want To Work With

DATABASE TRENDS - FINDINGS & IMPLICATIONS

Findings

- MySQL is the most popular database followed by Microsoft SQL.
- MongoDB and Redis are emerging databases.
- Elasticsearch is the new entrant.

Implications

- Companies still prefer open source databases.
- NoSQL database is more useful for non relational data management.
- Redis supports abstract data types.

Demographics

Respondent Distribution by Age

Age

- Prefer not to say
- 18-24 years old
- 25-34 years old
- 35-44 years old
- 45-54 years old
- 55-64 years old
- 65 years or older
- Under 18 years old

Respondent Count by Country.

Country (Count)

1 3,441

Respondent Distribution by Formal Education Level.

Respondent Count by age, classified by EDlevel.

DISCUSSION

- We discussed the emerging trends in ICT.
- There is a need for reskilling of the workforce.
- Developing countries need to adapt more to the emerging changes.
- Need to bridge regional inequality.

OVERALL FINDINGS & IMPLICATIONS

Findings

- There is an age disparity in tech-enabled jobs.
- Platforms like AWS and Docker are gaining recognition.
- US and India dominate the workforce in IT sector.

Implications

- Firms across the sector need to adapt to the IT 2.0 revolution.
- Cloud Services will emerge as a new sub-sector in IT.
- Transfer of technology needs to happen at faster pace.

CONCLUSION

- **Skill Focus:** JavaScript and TypeScript are key programming languages for developers at present and in the future.
- **Technological Growth Areas:** There is a growing demand for cloud technologies and modern databases, suggesting shifts toward scalable and distributed systems.
- **Targeted Training Programs:** Educational efforts can focus on JavaScript-based frameworks, cloud certifications, and database management to meet future trends.
- **Demographic Trends:** Younger developers (18–34) dominate the technology space, influencing market and training priorities.

APPENDIX

Top 5 Most Admired Programming Languages

Top 5 Developer Roles

JOB POSTINGS

In Module 1 you have collected the job posting data using Job API in a file named “job-postings.xlsx”. Present that data using a bar chart here.

POPULAR LANGUAGES

In Module 1 you have collected the job postings data using web scraping in a file named “popular-languages.csv”. Present that data using a bar chart here. Order the bar chart in the descending order of salary.
